

Equivalence partitioning							
ID	test step	status	test data		- -17	18-99	100-
1	Verify that the Input field accepts a valid number within the allowed value	passed	50		15	50	105
2	Verify that the Input field rejects an invalid number below the allowed minimum	passed	15				
3	Verify that the Input field rejects an invalid number above the allowed maximum	passed	105				
Boundary values							
ID	test step	status	test data		- -17	18-99	100-
1	Verify that the Input field accepts a valid number on the Lower Boundary	passed	18		17	18	99
2	Verify that the Input field accepts a valid number on the Upper Boundary	passed	99				
3	Verify that the Input field rejects an invalid number just below the allowed minimum	passed	17				
4	Verify that the Input field rejects an invalid number just above the allowed maximum	passed	100
