

Testing types

1. Static
Ensure user registration requirements are clear and complete.
2. Functional
Verify that a product is successfully added to the cart when clicking the “Add to cart” button.
3. Usability
Verify that the User Profile button is easily visible and accessible for users to find.
4. Compatibility
Verify that the website displays correctly and functions properly in the Chrome browser across different versions.
5. Performance
Verify that the load speed for the registration page is less than 1 sec.
6. Security
Check that the website opens with https and doesn't show a security warning in the browser.
7. Accessibility
Check that all images on the website have descriptive alt text to support screen readers.
8. Regression
Check that the filtering functionality still works properly after adding new filter categories.
9. Negative
Verify that the registration form doesn't accept an invalid email format and displays an error message.
10. Ad-hoc
Try dragging or clicking on all images to ensure nothing unexpected happens on the page.
11. Smoke
Verify that the home page loads successfully without any major errors.
12. Localization
Ensure that switching the language updates all page content correctly.
13. Boundary
Verify that a password with a maximum of 8 characters is accepted on the Log in page.
